

Do you have a background in applied math, statistics and business?

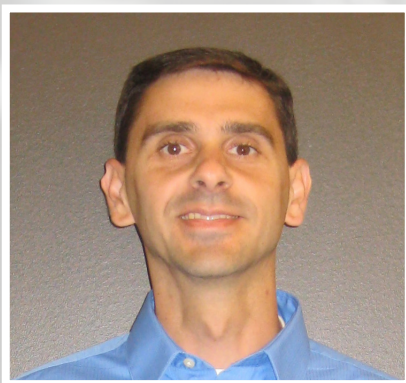

Find out if a career in Financial Engineering is right for you!

Financial Engineers (FE) support the trading groups through quantitative problem solving, trading strategy formulation and back-testing, statistical analysis, and pricing of financial derivatives. CTC recognizes the vital role of FEs in a dynamic trading environment and the value of integrating FEs directly into our trading operations. FEs will have the opportunity to work closely with traders and must be able to function effectively when challenged by the pressure of working close to the tip of the spear.

October 1, 2013
5:30-7:00 p.m.
127 Hayes-Healy Center

Pizza and beverages will be served.

Speaker:

Greg Sobczak, PhD

Dr. Greg Sobczak is an Executive Director and the Head of Financial Engineering at Chicago Trading Company. He is a 1995 graduate of the University of Notre Dame, earned a Masters in financial mathematics from the University of Chicago and a PhD in astrophysics from Harvard University.

Dr. Sobczak has 13+ years of experience in the options market-making industry.

This lecture is organized by the Department of Applied and Computational Mathematics and Statistics and the Department of Physics, University of Notre Dame, and the Chicago Trading Company, Chicago, IL.
