

Do you have a background in applied math, statistics and business?

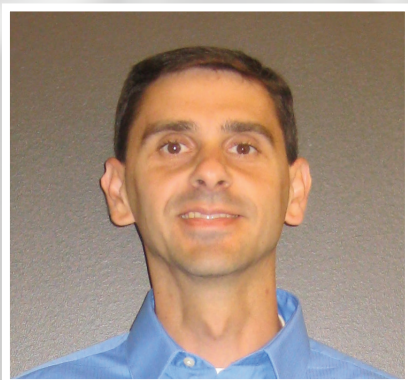

Find out if a career in Financial Engineering is right for you!

Financial Engineers (FE) support the trading groups through quantitative problem solving, trading strategy formulation and back-testing, statistical analysis, and pricing of financial derivatives. CTC recognizes the vital role of FEs in a dynamic trading environment and the value of integrating FEs directly into our trading operations. FEs will have the opportunity to work closely with traders and must be able to function effectively when challenged by the pressure of working close to the tip of the spear.
